

Cutting Clause

In the event of a pipe and/or structural steel section being damaged but being reasonably usable for the purpose for which it was originally intended if the damaged part is cut off, **Underwriters' liability shall be for the proportion of the insured value which the length of the part cut off bears to the length of the complete pipe and/or structural steel section** but they shall have the benefit of any salvage in respect thereof. **In addition the Underwriters shall be liable for the costs of cutting, cutting and refitting flanges, re-cutting bevels or otherwise rendering the pipe usable for its original purpose.**

In case of conflict between this clause and body of the policy or other additional clauses , this clause shall prevail. All other terms, conditions, and exclusions of the policy shall remain unchanged.
